1 x W2432 - MIG/DC-TIG/STICK WELDER ENVY MULTI	\$1,650.00
1 x W002 - Auto Darken Welding Helmet - 9~13 Shade	\$170.00
1 x W140A - Ø0.8mm Mild Steel MIG Welding Wire ER70S	\$29.70
1 x W100 - ROGUE™ Heavy Duty Welding Gloves - 400mm	\$129.95

**Normal Price (Inc): \$1,868.65**

ORDER CODE:	K0182A
MODEL:	ENVY MULTI 195 - Package Deal
Type:	MIG/DC-TIG/STICK & Multifunction Welder
Part Number:	U11204
Voltage (V):	240
Recommended Plug Amperage (amp):	10
Welding Current Range - MIG (amp):	25 - 195
Welding Current Range - STICK (amp):	10 - 195
Welding Current Range - TIG (amp):	10 - 195
Duty Cycle (% @ amp):	15 @ 195 - MIG & 30 @ 195 - TIG
Wire Spool Size (kg):	1 & 5
Ferrous Wire Size - Range (mm):	0.6 - 1.2
Stainless Steel Wire Size - Range (mm):	
Aluminium Wire Size - Range (mm):	
Recommended Generator (KVA):	8.5
Dimensions (mm):	640 x 210 x 400
Nett Weight (kg):	15.5

## Description

### ENVY MULTI 195 - MIG/DC-TIG/STICK WELDER

#### Double Pulse

A double pulse weld alternates between a peak current and two base currents, reducing the heat input of the weld even further than single pulse, while still maintaining all of the benefits. Because of the faster freezing puddle, your double pulse welds come out looking just like a stack of dimes. You get the aesthetics of a TIG weld with all the speed of spray MIG.

#### Single Pulse

A single pulse weld alternates between a peak and base current, which works to minimise the amount of heat input without compromising on any of the penetration. The addition of a base current and reduction in heat means it's perfect for softer materials like aluminium. Pulse welding is also done by spray transfer, eliminating spatter and cutting your post-weld clean-up time.

#### MIG Smart-Set

Ready to weld with the press of a few buttons. Simply select your joint type, filler wire, gas mixture, and wire diameter, and the machine will choose the ideal settings. If it's a little off, you can make manual adjustments to finetune every weld.

#### High-Frequency TIG

Maximise your results from start to finish. A high-frequency torch can start an arc without contacting the workpiece, reducing the risk of contaminating the tungsten or the weld. It also means you get access to the entire TIG weld cycle, including pre- and post-gas and up and down slope parameters.

#### TIG Smart-Set

Starting a weld has never been faster with the class-leading synergic TIG. Choose your material, joint type, tungsten diameter, plate thickness, and gas mixture, and you're off and running. If it's not quite right, you can tweak the parameters to perfection.

#### Hot Start

Get the smoothest arc starts possible. The Arc Start function gives you the option of either a boost of current or a reduction in current at the beginning of your weld. The arc start eliminates any issues with starting on cold metal, lets you weld on thicker materials, stops burn through on thinner materials, and makes welding aluminium even easier.

#### Crater Fill

End your welds as strong as they started. The Arc End feature ramps your welding current and voltage down at the end of a weld, filling it in at a lower amperage, eliminating craters and pinholes.

## Product Brochure For K0182A

---

### Digital 4 Geared Wire Drive

Experience unparalleled accuracy with our Digital 4 Geared Wire Drive system. Designed to sustain a consistent arc in varying conditions and with different wire types, it ensures an accurate wire feed speed. With this system, achieving precision in every welding task is effortless.

### Optional Foot Pedal

Enjoy greater control and precision with our optional foot control accessory. This handy feature allows you to easily adjust your TIG amperage on the fly, without interrupting your torch movement. Wireless and wired options available.

### Push-Pull Gun

Achieve smooth and steady wire feeding, especially when using softer wires such as aluminium. With a 'Pull' motor built into the torch, the wire can be fed over a greater distance, granting you the freedom to move and manoeuvre with ease while MIG welding.

### Spool Gun

Make welding aluminium even easier. No need to change your existing setup. The spool gun lets you quickly switch over and get any job done with no downtime.

### Power Factor Correction (PFC)

Get the most out of your machine. The PFC maximises the electrical efficiency of the machine and automatically compensates for any voltage fluctuations, so you get more output power and the internal components last longer.

### Inverter Technology

Not every inverter is made equal. With UNIMIG's ever-evolving, state-of-the-art IGBT Inverter technology, you get better performance, better efficiency, and better reliability.

### Smart Fan

Smart Fan diminishes noise, saves power, helps reduce energy costs, and minimises the number of contaminants being pulled through the machine.

### 10A Plug

Plug in and play. The 10A plug can be used on any domestic outlet, so it's perfect for the DIY home handyman or the professional welder looking to take it anywhere.

### Advanced MMA Features

Advanced MMA features are designed for improving weld quality and ease of use.

### Pulse MMA

Revolutionary pulse stick reduces spatter, improves heat control and makes for easier slag removal, as well as improves the speed and efficiency of vertical up welds without sacrificing any root fusion.

### Arc Force

The Arc Force feature helps to keep the arc stabilised throughout the weld, by increasing or decreasing the peak current to compensate for your arc length, preventing the arc from cutting out or the electrode from sticking.

### Hot Start

The adjustable hot start is designed to help with striking an arc. The hot start temporarily boosts the output current at the start, making striking an arc, even with difficult electrodes, much easier. You get smoother arc starts, improving the quality of your weld.

### Anti-Stick

The Anti Stick feature, which is always on, prevents your electrode from sticking to your workpiece. When the machine detects sticking, the current will drop significantly, so the electrode can be removed.

### Job Memory

The job memory function allows you to enter and store weld parameter settings. Weld parameters can be further adjusted and stored as required. A total of 100 jobs can be memorised and stored for recall.

### Generator Compatible

Take it anywhere. Connect the machine to a generator and use it wherever, whenever you need it. We recommend 8.5kVA for this machine.

### Inductance Control

Take complete control of your arc with the inductance settings. By changing the frequency of your short circuit MIG welds with the Inductance controls, you can choose your preferred arc characteristics on every weld.

### Dual Gas Inputs

Set up for MIG and TIG at the same time. With dual gas inputs for both weld types, you won't need to swap your gas when you swap torches. The quick connect inputs also make replacing your gas bottle as simple as unplugging and plugging in.

### Lightweight & Portable

Weighing just 15.5kg, you can take this machine with you anywhere.

### Burnback Adjustment

Stop your wire from ever fusing with your weld or your contact tips again. Tune your burnback control to suit how much wire you want to remain sticking out from your torch when you finish a weld.

## Features

- ENVY MULTI 195 - MIG/DC-TIG/STICK WELDER - (W2432)
- Single and double pulse MIG programs & high-frequency DC TIG
- MIG & TIG Smart-Set weld modes for complete synergic setups
- 10 amp plug, so you can use it with any domestic outlet

## Includes

Product Brochure For K0182A

- ENVY MULTI 195 - MIG/DC-TIG-STICK WELDER
- PROMAX 350 - Auto Darken Welding Helmet
- ROGUE™ Heavy Duty Welding Gloves - 400mm
- 5kg Wire Mild Steel MIG Welding Wire
