Description

Ideal for the model maker machining miniature parts

Small in size but packed full of features, this miniature lathe could provide the perfect introduction to those wanting to have a first try at metal turning.

The machine is small enough to fit into the corner of the workshop and light enough to be truly portable. The construction is predominantly from cast iron and steel and the capacities, 180mm diameter and 300mm between centres, are surprisingly large for a machine of this overall size.

Features such as the electric variable speed control, manual or powered leadscrew feed and an extensive range of accessories. The lathe comes supplied with 80mm diameter three jaw self-centring chuck, tailstock centre and service tools.

Machine also supplied with 5 piece 8mm turning tool kit.

Features

- Precision 'V'-beds are hardened and ground
- Cast iron ribbed bed
- Dovetail cross and compound slides
- Electronic variable speed 0-2500rpm
- High/low speed gear lever
- Forward/reverse spindle direction switch
- Conveniently mounted safety emergency stop switch
- Includes a set of change gears for metric thread cutting
